EDUCATION

Jomo Kenyatta University of agriculture and technology — BSC Information Technology
September 2022 - 2025

Jomo Kenyatta University of agriculture and technology— Diploma in Information Technology
September 2020 - April 2022

PROFESSIONAL TRAINING AND CERTIFICATES

- Certificate in Data Science by IBM
- Diploma in Information Technology by JKUAT
- Certificate in data analytics by Goggle
- Improving Healthcare: The role of artificial intelligence by IBM
- Improving Healthcare: The role of cloud computing by IBM
- Improving Healthcare: The role of data analytics by IBM
- Computer security by CISCO
- NDG for Linux by CISCO
- Network Defence by CISCO
- Junior Cyber security analyst by CISCO

PROFILE

Information Technology Graduate from Jomo Kenyatta University of Agriculture and Technology, highly motivated and detail-oriented, with a strong foundation in IT supported by a diploma and certifications in data science, artificial intelligence, cloud computing, and data analytics. Eager to apply and further develop technical and analytical skills in a dynamic organizational environment, while contributing effectively to technology-driven goals.

WORK EXPERIENCE

Pathways Technologies Limited - Data Engineer
June 2026 – Present

Key Responsibilities & Contributions:

- Develop and maintain ETL/ELT data pipelines for extracting, transforming, and loading data from multiple sources.
- Build and manage data processing workflows using SQL, Python, Apache NiFi, and Docker.
- Work with PostgreSQL, Neon, and Microsoft SQL Server/SSMS to manage, query, and transform data.
- Design and maintain data models and database structures to ensure reliable and accessible data for analytics.
- Develop interactive Power BI and Apache Superset dashboards for business intelligence and data-driven decision-making.
- Transform, clean, and prepare datasets for analytics, reporting, and visualization.
- Use InsightGrid to support data analysis, monitoring, and analytical workflows.
- Containerize and manage data applications and services using Docker.
- Collaborate with stakeholders to understand data requirements and develop appropriate data solutions.
- Monitor data quality, pipeline performance, and workflow reliability to ensure accurate reporting.

ICT Authority - IT Officer
Jan 2026-june 2026

Key Responsibilities & Contributions:

- Designed and developed a role-based Project Management System for ICTA to streamline project planning tracking, and reporting.
- Implemented a role-based access control system, ensuring secure and structured access for different user levels.
- Built the system around projects and components, enabling efficient breakdown, tracking, and managemer of project tasks and deliverables.
- Led development activities including requirements gathering, system design, development, and deploymer
- Developed features for real-time monitoring, task assignment, and progress tracking to improve workflow efficiency.
- Participated in stakeholder meetings and contributed to discussions and negotiations with the World Bank team on project implementation and alignment.
- Documented system functionality, workflows, and user guidelines to support system adoption and scalability.

Avané Clinic - SEO & Digital Systems Associate
Nov 2025 - Jan 2026

Key Responsibilities & Contributions:

- Managed website updates, digital systems, and SEO optimization
- Implemented GA4, GTM, Meta Pixel, and Google Ads tracking
- Built and optimized landing pages and improved site performance
- Produced weekly analytics and technical reports
- Managed social media accounts and content scheduling
- Handled online engagement and audience communication
- Tracked social media and campaign performance metrics
- Coordinated digital marketing efforts across web and social platforms

TECHNICAL SKILLS

Data Engineering & Analytics
- ETL/ELT & Data Pipelines: Apache NiFi, Python, SQL
- Databases: PostgreSQL, Neon, Microsoft SQL Server, SSMS
- Data Processing & Transformation: Python, Pandas, SQL
- Data Visualization & BI: Microsoft Power BI, Apache Superset, InsightGrid
- Data Modeling & Reporting
- Data Quality & Pipeline Monitoring

Programming & Software Development
- Programming Languages: Python, JavaScript, PHP, C, C++
- Frontend Development: HTML, CSS, JavaScript, Bootstrap
- Backend Development: PHP
- API Development & Integration: REST APIs
- Software Development & System Analysis

DevOps & Infrastructure
- Containerization: Docker
- Data Workflow Orchestration: Apache NiFi
- Cloud Computing
- Application Deployment & System Integration

AI & Data Science
- Data Science: Data Analysis, Data Cleaning, Exploratory Data Analysis
- Machine Learning: Scikit-learn, Predictive Modeling
- Artificial Intelligence: AI Applications and Machine Learning
- Big Data: PySpark, MLlib

Web, Digital & Analytics
- SEO: Technical SEO, On-page SEO, Google Search Console
- Digital Analytics: GA4, Google Tag Manager
- Digital Advertising: Meta Pixel, Google Ads Tracking
- UI/UX Design & User Research
- CRM & Digital Systems

Other Technical Skills
- Requirements Gathering
- System Design & Documentation
- Role-Based Access Control (RBAC)
- Software Testing & Debugging
- Technical Reporting
- Stakeholder Collaboration
- Project Management

LANGUAGES

- English
- Swahili

REFERENCE

Name: Mr. Joshua Opondo
Position: Assitant Director
ICT Authority
Email: joshua.opondo@icta.go.ke

One World Leadership Institute (Owli Africa) - Software Engineer Intern
Oct 2025 – December 2025

Key Responsibilities & Contributions:

- Conducted user research to inform the design and improvement of a Learning Management System (LMS) supporting vulnerable families
- Contributed to UI/UX design and front-end experience improvements to ensure intuitive and user-friendly learning journeys
- Collaborated with University of Maryland student teams on platform research and design activities
- Identified user needs and translated findings into accessible and inclusive interface designs
- Supported CRM-related workflows and data organization to improve learner and stakeholder engagement tracking
- Helped enhance digital accessibility, usability, and engagement across the platform
- Participated in testing and feedback cycles to refine user experience and system interaction flows
- Promoted digital inclusion through simplified navigation and learner-centered design decisions

Bright Innovation Limited — Junior software developer
May 2024 - August 2024

- I gained experience in software development, system analysis, and IT management, working with PHP, JavaScript, XAMPP, and Microsoft Dynamics NAV.
- Supported the team in graphics and design and project management.
- Bright Innovation Limited, Nairobi, Kenya — assistant IT consultant
- September 2021 - December 2021
- Handled customer site inquiries, providing technical support and troubleshooting.
- Conducted system analysis to identify and resolve IT issues.
- Documented processes and procedures for efficient knowledge transfer.
- Prepared multimedia content for training and presentations.

PROJECTS

- **Project Management System**

improving project tracking, reporting, and workflow efficiency.

- **Barbershop Booking and Payment System**

Developed a web-based system with chatbot booking, M-PESA payment integration, and invoice printing using PHP, MySQL, and Dialogflow.

- **Hospital Information System for CEMA**

Built a client and program management system with RESTful APIs, user authentication, and clean modular design for healthcare data handling.

- **COVID-19 Spread Prediction System**

Designed a big data pipeline using PySpark and MLlib to preprocess and model COVID-19 spread on distributed datasets for predictive analysis.

- **Green Guard – AI-Powered Plant Disease Detection**

Created a web-based AI tool that detects plant diseases from leaf images using image processing and deep learning, providing early diagnosis and treatment suggestions.
